For Refinery Offsite Operations Professionals

OEA1202D-From Concept to a Learndash Curriculum

Purpose of this Document

- This document describes all processes involved to create a lesson video from the concept or idea of a topic for the academy.
- These processes range from front-end automation using MS office products, VBA code, server-side scripts, cmd file, sftp transfer, thumbnails, descriptions, Topic datasheets and Course catalogue (eBook) and product prices, payment plan etc.
- Some of these processes may be discussed in separate documents due to complexity and desired documentation modularity.
